We would like to present to you our latest developments

### THE OFFICIAL LLOYDS CERTIFICATE OF OUR WEATHERTIGHT SPRAY SHUTTER

The spray shutter is an option behind our ventilation louver which acts as a solid weathertight solution. The spray shutter meets the requirements of the Large Commercial Yacht Code LY2/3 and Section 2.9.2 of the PYC code.

### OUR COMPLETE NEW LOUVER TYPE: SR2500

This product is the amazing result of combining functionality with design and especially developed as ceiling louver. Come and see the additional option of LED lighting as well.

### INVISIBLE LOUVERS

We receive frequently recurring questions regarding invisible louvers and rotating blades.

Therefore we have designed a concept with both specific wishes in mind, which resulted in our Z-lamella. We have created invisibility by combining rotating blades with glass. Rotating blades are suitable for many purposes such as ventilation and sun shading.

Discover the creative applications that our products can offer.  
We are curious about your opinion.
